**Transforming spaces
into experiences**

HOSPITALITEK

CARPINTEK® Group

The power of detail

The personality of a space is perceived in what is not said but is felt..

HOSPITALITEK

CARPINTEK® Group

At the service of contemporary luxury

Full-service interior design execution turns a creative concept into a cohesive and precise reality.

To design is to imagine; to execute is to give shape with excellence and sensitivity.

In Hospitality there are various spaces such as rooms, restauration, meeting and wellness areas. Each space is adapted to its use within the same overarching identity

Meticulous execution ensures balanced, functional, and timeless environments that convey value, comfort, and character. Made to last for intense living

Our Services

Technical Development, Manufacturing, Installation, and After-Sales

1. Technical analysis and coordination with the architecture.
2. Product engineering: detailing, joints, and specifications.
3. Mockups and samples for validation of the proposed solutions.
4. In-house production and manufacturing.
5. Quality control via checklist and pre-shipment inspection.
6. International logistics and customs.
7. Installation by our own specialized teams.
8. After-sales service.

Manufacturing and installation of the wooden windows for Hotel Neri*** Relais & Châteaux Barcelona. Gothic Quarter.**

CDL Commercial office at LA FINCA Madrid

CHANEL furniture. ECI Madrid

HOSPITALITEK

CARPINTEK® Group

A Distinctive Treat

Hospitality projects require more than just a supplier; they need a technical and creative partner capable of anticipating needs, solving challenges, and adding value at every stage.

Industry expertise allows us to understand the creative vision, execute it with precision, and consistently meet the most demanding standards.

Local Precision and Global Efficiency

A flexible, sustainable, and competitive structure capable of adapting to the specific needs of every hotel—combining technical excellence, operational efficiency, and environmental responsibility in every project.

Hospitalitek features a hybrid production model that combines our own manufacturing lines in Spain with an international network of specialized partners. This structure allows us to tackle hotel projects of high technical complexity with efficiency in big developments.

Manufacturing in Spain is focused on the development of unique elements and high-level detailing, where precision, process control, and finish quality are key. Special pieces, prototypes, custom solutions, and handcrafted components are produced under strict standards respecting the design.

In addition, Carpintek Group has international manufacturing capacity through certified partners in various countries, specifically focused on high-volume production of hotel furniture. This production reach allows us to scale projects rapidly, maintain aesthetic consistency, and optimize costs without compromising the quality.

This organization provides clear advantages: reduced production costs, optimized logistics, faster turnaround times, and a significant reduction in the carbon footprint by manufacturing components as close to the project site as possible.

A balance between unique detail, efficient production, local precision and global capacity at the service of the project.

**Manufacturing and assembly
without borders**

The coherence that shapes every project

Hospitalitek operates with a flexible and collaborative approach, adapting to the specific needs of each project and the level of involvement required at every stage.

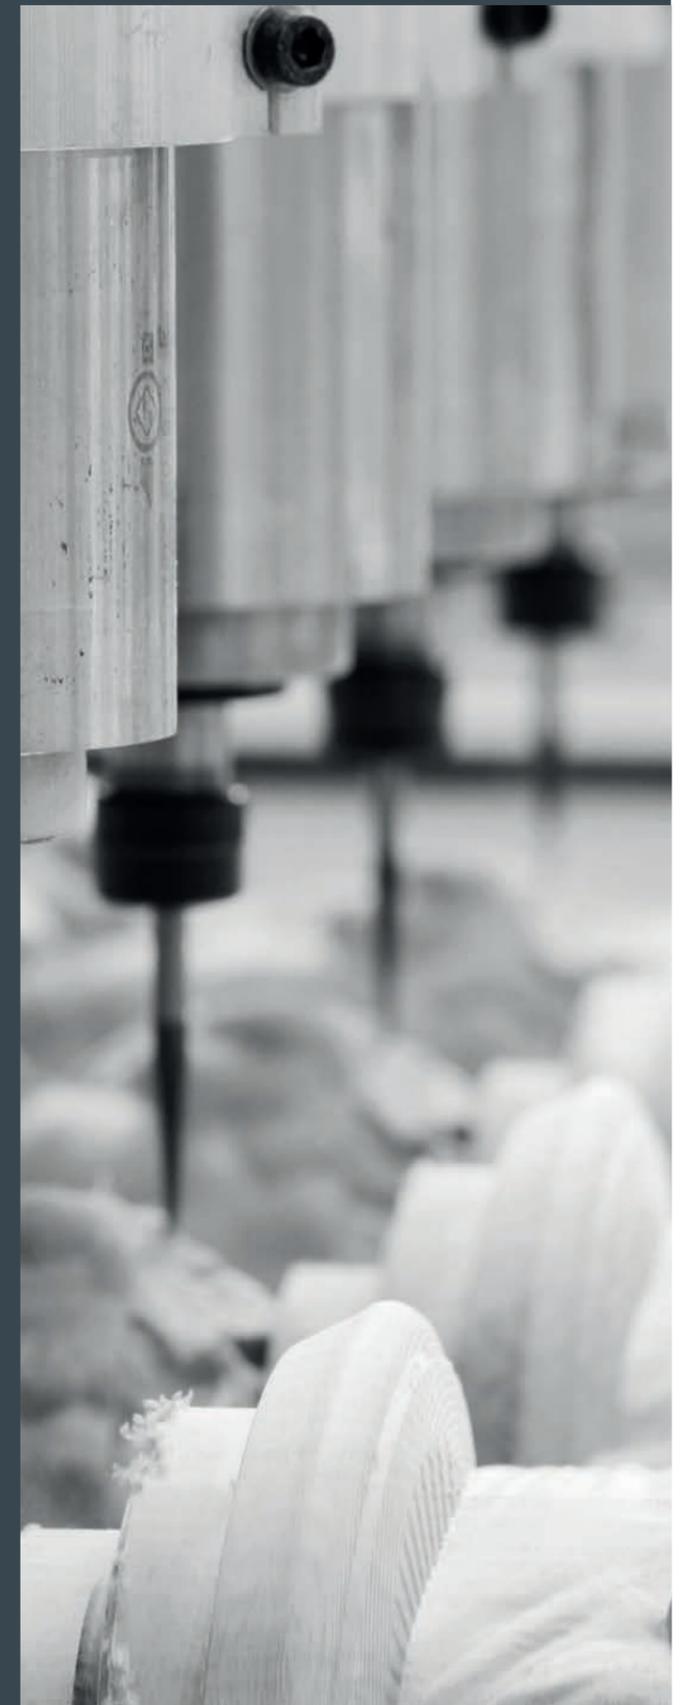

Our primary model is based on the specialized manufacturing of elements designed by architects, interior designers, and hotel chain technical departments. Working from defined designs, Carpintek Group provides technical expertise to advise and optimize for every solution: material selection, construction systems, manufacturing feasibility, durability, maintenance, and cost control—always respecting the project's original identity and vision.

Additionally, **the company offers a collaboration model that includes consulting and technical design development for architecture and interior design firms.** In this role, Carpintek Group acts as a technical partner, developing the detailed interior design project and shop drawings. This includes defining construction solutions, technical details, and all necessary documentation to ensure a perfect manufacturing of the project.

Our experience of over 20 years speaks for itself!
The coherence that shapes every project

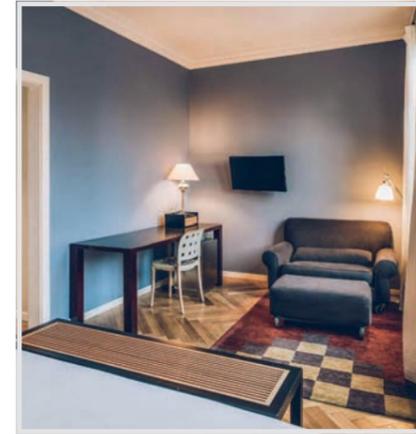

Working Models: Collaboration, Consulting, and Specialized Manufacturing

Both models share the same principle: working as a team, adding real value to the project, and ensuring that every solution developed is technically viable, aesthetically sound, and executable to the highest quality standards.

Premium solutions for new ways of living and working

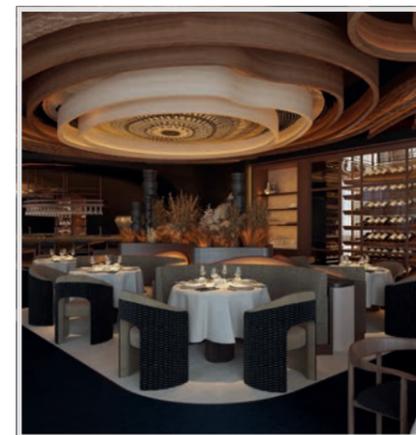

Hotels

From design to experience. To inspire, to stay, and to define the brand—interior design to feel and enjoy.

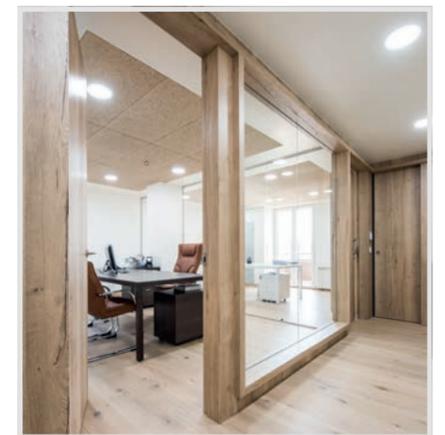

Flex living

Spaces that adapt to people. Solutions for new lifestyles. Flexible design, precise manufacturing, practical and realistic.

Dining & Restaurants

Materials that withstand the pace of service. Character, functionality, and durability in every detail. Designed to attract. Built to last.

Offices & Retail

Environments that prioritize well-being and calm. Materials, textures, and solutions designed to care.

Highlighted projects

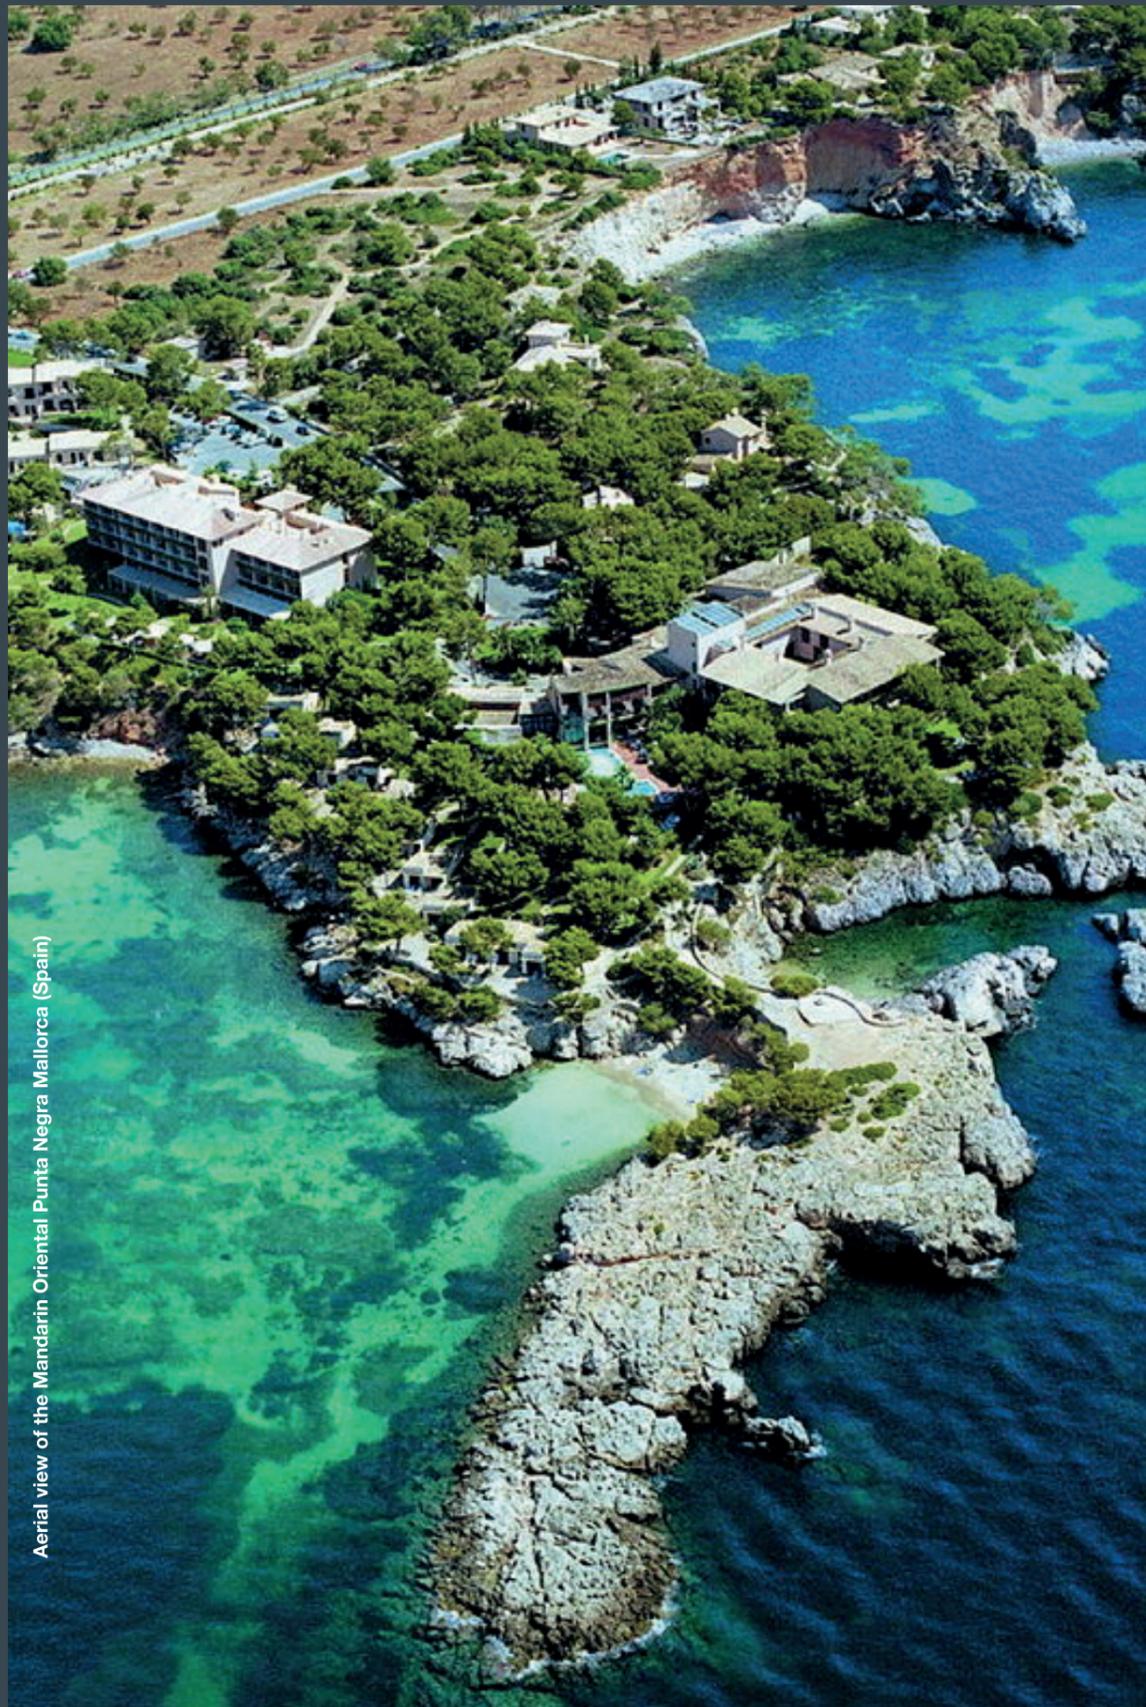

We collaborate with top-tier hotel brands and restaurant operators in the execution of projects where excellence, attention to detail, and on-site reliability are decisive. Our experience in five stars environments positions us as a solid partner for the materialization of unique spaces in high-end hospitality and restauration projects

Technical precision and complete construction documentation.

In-house mock-ups and comprehensive validation of solutions.

Hybrid production: efficiency + premium quality.

Large-scale volume capacity.

Specialized hotel installation teams.

End-to-end support from concept to delivery.

About us

Carpintek Group is a specialized group in custom carpentry, woodwork, joinery and furniture for hotel projects and high-demand environments. We focus on transforming designs into real solutions, overseeing every phase of the process with a technical, precise, and excellence-oriented approach.

We develop fixed furniture that defines the character of spaces: wall paneling, doors, wardrobes, headboards, bars, and meshes—all designed to integrate seamlessly with the architecture while meeting the highest standards of quality and durability. Furthermore, we manufacture loose furniture, such as sofas, chairs, armchairs, tables, nightstands, and minibars, always in line with the project's identity and intensive use requirements.

Our key differentiator, our solid technical engineering, which includes detailed shop drawings, tolerance control, and the definition of assembly solutions that guarantee precise on-site execution. To ensure the design, we produce mock-ups and samples, validating all with the client and the design teams prior to final production.

Quality products and services

Carpintek Group applies exhaustive quality controls, both at the source and the destination, ensuring that every element meets the defined technical and aesthetic specifications.

Finally, we offer a comprehensive installation and supervision service for hotel sites, coordinating teams and processes to guarantee a perfect result—delivered on time and with the level of excellence required by high-end project.
